SKILLS

- **Programming Languages:** Python, Java
- **Web Development:** HTML, QML, CSS, JavaScript, React, Angular
- **Database:** MySQL, MongoDB
- **AI & ML**

INTERNSHIP EXPERIENCE

DRDO – Human Machine Interface Development(Intern)

Dec 2024 - Jan 2025

- Developed interactive UI projects showcasing HMI capabilities using Qt and QML.
- **Image Magnification & Range Selection Tool:** Built an advanced image viewer with dynamic clipping, zoom, and smooth transitions.
- **Data Logging & File Transfer App:** Designed a modern GUI tool for serial communication, supporting COM port selection, real-time file transfer, and progress tracking.

Motioncut – Web Development(Intern)

July 2024-Aug 2024

- Created frontend projects demonstrating skills in UI/UX design and web interactivity.
- Designed an attractive e-commerce product page using HTML and CSS.
- Built a dynamic image slider using HTML, CSS, and JavaScript.

PERSONAL PROJECTS

- **Stock Maintenance System:** Developed a Flask-based web app for inventory management. Features include adding, updating, deleting, and searching stock items, with a user-friendly dashboard and MySQL backend for data persistence.
- **Pay-Flow App:** Designed a mobile-first UI (React) for managing mock payments and subscriptions. Implemented responsive dashboards, charts, and transaction history to simulate fintech applications.
- **Expense Tracker App:** Built a Python-Flask web app to track expenses by category and date. Integrated visual charts (Pie/Bar), monthly limit alerts, exportable PDF/Excel reports, and speech-to-expense input.
- **Bug Buster Game:** A browser-based debugging game created using HTML, CSS, and JavaScript. Includes multiple levels (beginner to advanced), a countdown timer, animated failure effects, and motivational scoring.
- **Linux Tray Utility:** Python GTK application for Linux to manage power button events with a system tray interface, improving system usability for laptop users.

HACKATHONS

Smart Vehicle Parking System — Smart India Hackathon (College Level)

- Proposed and built an IoT-based smart parking system with real-time sensor data sent to the cloud/local network for visualization and optimization.

CERTIFICATIONS

Cisco: Introduction to Cyber Security — **CCNA:** Introduction to Networks — **Infosys Springboard:** Angular Web Developer Certification — **MathWorks:** OOP, Machine Learning Onramp — **ICT Academy:** UiPath Studio Automation

EDUCATION

B.Tech IT –Loyola ICAM College of Engineering and Technology, (CGPA: 8.32)	2022–Present
SSLC –St. Kevins Anglo Indian Higher Secondary School,(Percentage: 86%)	2021–2022
HSC –St. Kevins Anglo Indian Higher Secondary School,(Percentage: 75%)	2019–2020
